## Unica

Elegant and refined

Looking for a unique partner that matches your way of life and your personality? Energy saving, safety and protection, comfort, entertainment and communication; new Unica cares for you.

Designed excellence
Unica products are manufactures according to the higest design specifications. The range provides a large variety of features and functions - all of which you can expect from a high-end Schneider Electric's range.
You can now choose them to fit with your own taste and style. And you can be as creative as you are with the decoration of your living room or the design of your hotel room.

Style and sophistication
Unica has an attractive design and a variety of colours, shapes and materials that cover every end-user requirements.
Strong presonality, sober, stylish and ready to switch your home/room into a warm, personal and comfortable place.

## Unica Class,

let nature into your home

Unica Class design is all about materials and how these materials project elegance and sophistication. Whether it be the rugged slate look or the simplicity of metal, Unica materials match the tone of any environment.

## Unica <br> Class

## Unica Class Wood

## A distinct refinement

A choice of classical nuances and timeless design that makes your heart click.
Enter in a haven of warm and personal atmosphere.
Wood is natural, durable, exquisite.

## Unica Class Slate

Natural, rugged elegance
Minerals are timeless and eternal. Those qualities bring a very special ambience into a room. Stone enhances the simplicity in all strict and open interiors. The individual patterns and shapes of minerals also increase a room's personally flavored distinction.

## Unica Class Metal

## A clean, cool finish

Introduce a metal finish to convey a clean, cool, modern look for your fittings. The Unica Class metal has a solid clean elegance which enhances sober interior ideas.

## Unica Class Glass

Contemporary class and elegance
Highlight the clean atmosphere in a bright room with Unica Class in white glass. Make it exuberant and exciting with black mirror glass.

Unica Class Tobacco Two gang two-way switch, type A2 outer plate

Unica Class Natural slate One gang two-way switch, type A2 outer plate

Unica Class Ice aluminium Three gang two-way switch, type A2 outer plate

Unica Black mirror
Two gang two-way switch,
type A2 outer plate

Unica Class Wenge
Double switched socket outlet, type B outer plate

Unica Class Natural slate Switched socket outlet, type A outer plate

Unica Class Ice aluminium
Switched socket-outlet,
type A outer plate

Unica Class White glass
Double switched socket-outlet,
type B outer plate

elegance and sophistication

[^0]
## Unica <br> Top

## Unica Top High-tech metal

Galvanic metal is a natural material signalling precious longevity. It remains an extensively used feature of interior design, simply because it will embellish both the modern and traditional, and any personal expression in between.
Unica Top metal is both a way to stylishly draw attention to exclusive, comfortable Unica Top functions and to help create a unique atmosphere

Unica Top Bright chrome
Switched socket-outlet,
type A outer plate

Unica Top Rhodium black
Rotary electronic dimmer,
type C outer plate

Unica Top White
Alarm clock,
type C outer plate

Unica Top Matt chrome
Two gang two-way switch, type A2 outer plate

Unica Top Matte nickel
Double switched socket-outlet,
type B outer plate

Unica Top Metal grey
Methane gas detector,
type C outer plate

# Unica Plus, 

personal design

Design, versatility, harmony, the intense elegance of colours
Unica Plus will perfectly fit with the pure aesthetic lines of your interior design.

# Unica <br> Plus 

## Unica Plus Metal

Unica Plus Bright chrome
Double pole one-way
switch with indicator,
type A2 outer plate

Unica Plus Gold metal
Switched socket-outlet, type A
outer plate

Unica Plus Coloured finishes

Unica Plus White
Switched socket-outlet, type A outer plate

Unica Plus Champagne Time delay switch type C outer plate

Unica Plus Sand Cooker control unit, type B outer plate

Unica Plus Cacao
Two gang two-way switch, ype A2 outer plate

Unica Plus Mist grey
TV/FM socket,
type C outer plate

## Unica Plus Terracotta

Unswitched british
socket-outlet,
type A outer plate

## Unica

## A range of colorful combinations

Color is what defines the mood of your home. Now you can customize your Unica Top or Class insert by choosing from two distinctive color schemes: aluminium and graphite.
And, by selecting from a range of tastful frame colors, numerous attractive design possibilities are available.

## Aluminium

## Graphite

A finish that gives off
a natural yet
contemporary feel.

## Unica

## Outer plates and functions: quick selection guide

Unica Class, Top and Plus are available in four different outer plates sizes, to match perfectly with each function.

## Outer plate A

For single socket outlets and fuse connection units.

Internal dimensions: $53 \times 70 \mathrm{~mm}$

## Outer plate A2

For switches and indicator room panel.

Internal dimensions: $53 \times 70 \mathrm{~mm}$

## Outer plate B

The option for double functions.

## Outer plate C

For all the global modular functions (RJ45,
TVs, electronics.....).

Internal dimensions: $112 \times 70 \mathrm{~mm}$

Internal dimensions: $45 \times 45 \mathrm{~mm}$

## Functionality

Unica oers a range of controls and functions to bring home owners comfort and reliability.

## Luxurious Hotel

Key card switch

Shaver unit

Control unit for outdoor panel

Indicator panel and bell switch

Harmonic Home

2 gang 2 way switch

13A 1 gang switched socket with 2 gang USB charger socket

Double pole switch

Fused connection u

Rotary dimmer

RJ45 data socket

Switched socket

TV/FM individual socket

## Common characteristics

- Connection: screw terminals
- Ambient air temperature for operation: -5 to $+40^{\circ} \mathrm{C}$
- Standard: IEC 60669-1
- Degrees of protection: IK01 / IP20
- Wiring practices: comply to BS 7671

## HD15 sockets

Multimedia sockets (cont'd)
USB charger

## Characteristics

- Rated operation voltage: 100/240 VAC - 50/60 Hz
- Input power: 7.5 W
- Output power: 5 V DC -1 A
- Output connectors: USB 2.0
- Cables: 1.5 to $2.5 \mathrm{~mm}^{2}$ rigid/stranded/flexible
- Protection type: short-circuit protection
- Ambient air temperature for operation: $-5^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$
- Standard: EN 60950-1, EN 62684, EN 301 489-4, EU-directive 2002/95/EC, WEEE $\neg$ directive 2002/96/EC
- Electrical insulation class: class II
- Environmental characteristic: REACH Regulation (EC) No 19072006
- Compatibility: Apple, Atmel, Emblaze mobile, Huawei Technologies, LGE, Motorola Mobility, Nokia, Qualcomm, Research in Motion, Samsung, Sony Ericsonn, TCT mobile (ALCATEL) and Texas Instruments.

## Ultimate <br> Screwless Flat Plate

## $\therefore+$

On | Schneider Electric

## Ultimate Screwless

## The Ultimate

Screwless Flat Plate range provides one of the most comprehensive choices of beautifully crafted, sophisticated fittings on the market. With only a mere 1.5 mm front plate depth, this cutting edge screwless design blends seamlessly onto wall surfaces.

The wide selection of finish choices within the range will ensure that you always find your perfect match. Choose from Stainless Steel, Polished Chrome, Pearl Nickel, Black Nickel, Painted White, Polished Brass, Gloss White, Piano Black, or Transparent.

Independent mechanical \& electrical connection for enhanced safety.

Two sets of fixing screws to accommodate differing mounting box depths.

Finish Selection

## Solutions for today and tomorrow

The rapid expansion of entertainment and communication devices requires an ever increasing diversity of wiring accessories to power, access and control the technology people use everyday.

Choosing ULTIMATE accessories not only provides all of the functions needed in the modern home but a choice of styles and finishes to match to the mood and use of every room.

## USB Solution

This contemporary range now comes with a USB charging solution, offering a simple solution to a modern day issue.

## Specification Highlights

Dedicated Key Card Switch to support your specification project requirements.

50A rated plate switches for switching appliances with higher current ratings, such as heaters, cookers and commercial refrigerating units.

16AX switch rating across all plate switches offers a future-proofed lighting solution to accommodate increased load requirements and fluorescent lighting demands.

Tamperproof front plate clip securely in to the mounting frames to add safety and protection. (Requires use of a tool for removal BS 7671).

Colour coded in-line terminals as well as a colour balanced back moulding makes terminals easily identifiable during installation, particularly in lower light levels.

## * (available on request only)

**Dependent upon wiring configuration, to aid installation 35 mm flush steel boxes are recommended.
Due to large plate foot print products may not be compatible with flush dual mounting boxes.

## Ultimate Screwless

## Ultimate

## White Moulded

## Ultimate White Moulded

wiring accessories offer a stylish, modern alternative to traditional white moulded products. Aesthetically pleasing and ultra-slim, these sleek fittings with their subtle curved profile and minimal back projections have been carefully designed to ensure ease of installation. Ultimate moulded has been extended with the introduction of slim profile outboard rocker switched sockets.

The range, which includes Euromodular and grid variants, was designed to complement the Ultimate Flat Plate ranges for situations where a combination of fittings may be required.

## Features and benefits

- An ultra-slim plate for minimum projection when flush fitted
- Minimal back projection to allow installation using standard flush mounting boxes for both new and retrofits (switches 16 mm , sockets 25 mm dependant on wiring configuration).
- Curved rockers with tactile switch action.
- Unique integral locking facility on isolator for added safety.
- Slim-line, compact neons for a less obtrusive look.
- Switches are fully rated at 10AX for fluorescent and inductive loads.
- Screw cap covers provide a sleek finishing touch (additional pair supplied for greater flexibility).
- Colour coded in-line angled terminals make selection even easier.
- Clear terminal marking ensures easy identification.
- Twin-earth terminals on 2-gang sockets.
- Double pole options on 1-gang and 2-gang switched sockets.
- All fuse carriers are lockable to prevent accidents during maintenance.
- Plated earth straps assist longevity for a corrosion free life.

## Euro Plates \&

## Modules

The stylish design of the screwless flat plates complement the Ultimate range of accessories and provides the complete installation solution.

The clip in module and plate design combines simplicity with versatility, facilitating selection and installation for both domestic and commercial applications.

## Features and benefits

- Euro modules are suitable for all decorative and moulded euro format front plates.
- Flexible system, modules clip straight into the plate from the front for quick and easy installation.
- Euro plates are built to the same high specification as the accessory ranges.
- A choice of high quality plate finishes ensures complete coordination with other fixtures and fittings.
- Euro front plate available in 1, 2 and 4 gang sizes.
- Modules available in black or white to match Ultimate wiring accessory interiors.
- Full range of TV, Radio and satellite modules.
- Single $25 \times 50 \mathrm{~mm}$ and double $50 \times 50 \mathrm{~mm}$ module sizes available.

## Ultimate Grid

## The comprehensive Ultimate Flat Plate grid system, which includes the Screwless Flat Plate range, has been specifically designed to upgrade from screwed to screwless and bring beauty and style to commercial spaces.

## Finishes

- Stainless steel with white or black interiors
- Polished chrome with white or black interiors
- Polished brass with white or black interiors

The Ultimate grid system is easy to install, high quality and high performance. With a stylish minimal front plate design, grid plates are available in a wide choice of metal plate finishes and white moulded finish.

## Features and benefits

- Front loaded switch modules.
- Modules can easily be upgraded without the need to remove the mounting grid.
- 10AX and 20AX fluorescent rated modules.
- Modules available for data, TV and telephone installations.
- Electronic dimmer module available to match cover plates.
- Socket headed plate fixing screws for additional security and reduce plate damage during installation.
- A wide range of pre-printed modules are available for a coordinated appearance.
- Smooth tactile switch action incorporating positive drive switch mechanism.
- Curved, matching metal capped rockers in a choice of white or black interior.
- Metal cappings are included on all modules from switches, to fuse carriers, flex outlets and data modules.
- All cover plates are supplied with appropriate grid frames.

A master piece for your walls

## Lisse <br> Metal Deco

## Curves in all the right places...

## Now in an elegant decorative finish.

The smooth, modern lines of Lisse Screwless Deco offer an understated elegance to compliment today's interiors.
Whatever your taste, you can express your personal sense of style in the home down to the finest detail through the comprehensive range of finishes Lisse Screwless Deco has to offer.

- Ideally suited for new construction and refurbishment projects.
- Future-proofed to cater for the latest demands in consumer technology.
- Painting and decorating made easy by the unique screwless design and clipping system.
- Cleverly designed to ensure that product ordering is simple and efficient, with many time and space saving solutions.
- Crafted with your customer in mind, adding bespoke solutions to make a lasting impact.

## Simple by design for home and business

Removable screwless cover and reliable clipin system make painting \& decorating easier.

Backed out and captive screw terminals to allow for positive drive and speed of installation.

Angled terminals for easier access.

7 mm raised edge profile offers easy installation for new builds and retrofits.

Twin earth terminals on all 2 gang 13A socket outlets, for high integrity earthing.

Light grey back moulding colour for easier terminal identification.

Cable markings on all products with a moulded template to check the wire length.

Minimum back projection frees up space in the back box for cabling

## Fall in love with snappy design

## Find your perfect match

Truly innovative and exceptionally stylish

- that's AvatarOn.

An exquisite combination of functionality and style, the AvatarOn range features wiring devices for all your home needs and perfectly complements any interior decor.
With their sleek, frameless build, the AvatarOn switches fi t snugly to the wall, while the easily changeable, snap-on covers allow for quick customization of the devices' look.

## Award-winning design

AvatarOn garnered one of the world's most authoritative and reputable industrial design trophies, the iF Design Award 2017.

## AvatarOn

## Let your imagination run wild

Treat the glossy surface of AvatarOn as your canvas. Choose from an array of fi nishings to fi nd a cover matching your interior or adorn the device with a favorite pattern or photo.
Design your cover in just a few clicks using a dedicated online order platform.
Your personalized design will then be printed in high-resolution digital technology, ensuring clear details and long-lasting colors.
With the easy-to-mount and customize AvatarOn covers, you can change the look of your devices any time you want, without any hassle.

## Savor the details

## More than just a switch

Have you ever struggled to find a switch in the dark? Choose the AvatarOn device with a clever soft LED locator. Unobtrusive by day, the fluorescent white glow indicates the switch's location at night, subtly emphasizing its aesthetics.

## Lasting looks

AvatarOn has no elements that are diffi cult to clean, so your wiring devices will keep both their looks and functionality over time.

The AvatarOn range also features a variety of helpful accessories, including a key holder and a mobile phone stand, designed for everyday convenience.

## Multiple-gang frames keep rooms tidy, while comfortably meeting power requirements

Pieno
Push the boundaries

## Pieno

Practical design with a touch of elegance

## Pieno

Uncluttered design with a distinctive jumbo dolly and an overall slim profile, Pieno has pushed the boundaries of the switch design paradigm. Each dolly fills its space, reaching the edges like no other. The maximized space of the integrated faceplate has enlightened the clean and clutterfree design, and seamlessly fits in to any space.

## Finishes

- White
- Wine Gold
- Aluminium Silver
- Matt Black

Bold straight lines accented by small curves bring sleekness to the muscular design language. Pieno is yet another switch to aspire to among the wide spectrum of Schneider Electric's design excellence.

## Features and benefits

- Uncluttered design with distinctive jumbo dolly
- Slim profile
- Hotel solutions available in the same finishes
- SS Mechanism Technology allows for a 3-degree short throw switching angle and flutter-free switching
- PerfectFace Technology allows for perfect rocker alignment

## Lisse <br> White Moulded

## Lisse <br> White Moulded

## The Lisse White Moulded range of wiring accessories offers

You no longer have to choose between convenience and efficiency, or compromise on appearance to get the most innovative features. Lisse is packed with a vast array of technical features, providing a high level of quality, reliability and value you can count on.

- Ideally suited for new construction and refurbishment projects.
- Future-proofed to cater for the latest demands in consumer technology.
- Made from durable, high quality urea with antimicrobial properties.
- Cleverly designed to ensure that product ordering is simple and efficient, with many time and space saving solutions.
- Crafted with your customer in mind, adding bespoke solutions to make a lasting impact.

## Quality as standard...

The smooth, modern lines of Lisse offer an understated elegance to compliment today's interiors.
Not only that - every attention to detail has been paid to the design and construction of this elegant white moulded range, built to make your installation faster, smoother, simpler.

Backed out and captive screw terminals to allow for positive drive and speed of installation.

Twin earth terminals on all 2 gang 13A socket outlets, for high integrity earthing.

Angled terminals for easier access

One and two gang spacers available for added installation depth.

7 mm raised edge profile offers easy installation for new builds and retrofits.

## Tailored to meet your needs...

Lisse has been cleverly designed to ensure that product ordering is simple and efficient, with many time and space saving solutions. What does this mean for you? Faster ordering, fewer part references and greater installation flexibility.

## Clever Illumination

Enjoy the subtle but elegant illumination provided by Lisse LED indicators. This optional feature shines through the front plate moulding when additional power indication is needed. Installation couldn't be easier, as the LED indicators are simply clipped in to place via a purpose-built holding space on the back of the front plate and leverage dedicated push terminals for cabling.

## Flexible Frames

Optional Flex outlet frames offer the additional cabling depth you need on site, without having to hold stock variations of the same product. Simply clip in to place with your standard FCU or control switch to install. One and two gang spacers are also available to provide the perfect solution for remodels and retrofits when extra installation depth is needed.

## Fully Antimicrobial

Lisse wiring devices can be used seamlessly with the Ultimate or Cableline anti-microbial 3 compartment trunking systems, to provide a high level of resistance to MRSA, E-Coli, Salmonella and Klebsiella Pneumoniae.

Weatherproof and Outdoor Solutions Timeless and traditional

## Exclusive

Weatherproof solutions

## Exclusive

## Weatherproof solutions

Our Weatherproof range offers tough, durable options for outdoor applications or more arduous environments. Socket outlets are IP66 or IP55 rated for even greater weather resistance.

## IP66

The IP66 range of weatherproof accessories offers the greatest amount of weatherproof protection on the market, with built-in eatures to safeguard users in the harshest of environments.

- Solid Protection: Completely protected against dust, the maximum rating for protection against solids.
- Liquid Protection: Protected against jets of water of similar force to heavy seas.

## IP55

For general weatherproof protection, the IP55 range of switches and sockets can be comfortably operated through a protective membrane, thus maintaining its full IP rating.

- Solid Protection: Protected against quantities of dust that could interfere with satisfactory operation.
- Liquid Protection: Protected against jets of water from all directions.

## Exclusive

## IP55 <br> Range

For general weatherproof protection against dust and liquids, the IP55 range of switches and sockets offers an effective solution for both indoor and outdoor environments when the maximum IP66 rating is not required.

The weatherproof membrane
is Phthalate free, UV stabilised and mould and algae resistant, to ensure long outdoor life without splitting or discolouring.

Switches can be operated through membrane, thereby maintaining full IP rating.

IP55 switches supplied complete in 1, 2 or 3 gang configurations using 25 mm modules.

All modules are independently type tested, with the enclosures giving a degree of ingress protection of IP55 - protection against quantities of dust that could interfere with satisfactory operation or powerful jets of water from all directions.

All enclosures incorporate a 20 mm knockout as standard with the option to increase to 25 mm via a unique drill start feature.

## Exclusive

## IP66 Range

Offering the maximum levels of endurance and protection, the IP66 Weatherproof range of sockets will perform in the most arduous weather conditions.

The smooth, curved design also delivers on aesthetic appeal whilst providing a high performance application.

Manufactured from tough impact resistant hermoplastic which provides strength and durability.

Protective gel seal ensures
IP66 for maximum weatherproof protection against any particles of dust and jets of water of similar force to heavy seas whilst in use. maximum safety whilst in use.
to neavy seas whilst in use.
$\qquad$

Standard knockouts for 20 mm conduit entry with additional cut-out facility to convert to 25 mm conduit entry.

IP66 sockets accept standard 13A plugs including moulded on
plugs.

## Specification Highlights:

Passive and Active RCD protected 2-gang socket outlet ensure essential personal protection. Passive Latching: Designed for food freezers or garden water feature pumps, ensuring that contacts will stay closed during loss of power so that RCD does not need re-setting when the circuit is restored. Active / non-latching: Designed for lawnmowers or power tools, the RCD will trip on loss of power and requires manual resetting when the circuit is to be re-energised.

## Kavacha

This sturdy range of switches and sockets are for outdoor areas that are susceptible to heavy blows, long time exposure to sunlight and where there is a risk of being splashed by chemicals.

Balconies, swimming pools, exterior walls and gardens will all be much safer from exposed electricity with Kavacha. Kavacha protects you and your family outdoors in five important ways. It guards against water sprayed from a hose. It guards against rain or water, is dust proof, impact resistant, UV resistant and also chemical resistant.

## Full time protection around the home

Accept any British standard home
appliance plugs

Space-friendly design enhances peace of mind as well as offering a sense of well-being and style.

Neutral colour and handy design blends in with your home decor.

Drainage holes prevent accumulation of water droplets due to condensation.

Protection shield easily lifted which allows access to socket. Co-injected weather seal for socket outlet to ensure plug is completely kept out of water and moisture while in use.

Designed to last and friendly to your home environment - can be used with ordinary electrical plugs at all times.

Large press dolly clearly visible to locate.

Tightly sealed around the plug cord - kept out of water and moisture at all times.

A safety feature for mounting switches to metal structures is the insulating caps that cover base mounting screws to totally protect them from any live cables.

Lever is pad-lockable in the "OFF" position.

Impact resistant base and cover can both be subjected to violent collisions. They are sealed with 1 piece of weatherseal gasket.

## S56 Series

## S56 Series

## 56 and 66 Series are dust-resistant and hoseproof.

They are made of ultra violet resistant PVC. An extensive choice of modules are available including switches and socket outlets. 56 and 66 Series offer safety in operation and are equipped
with locking facility. Additionally, when plugs are removed, the socket cover automatically locks into place, preventing dust or water from entering.

## S56 Series

## 56 Series Modules

Designed to mix \& match. Packed with
features designed to outperform all
other protected accessories

## S56 Series

## 56 Series Plugs

Schneider Electric 56 Series Industrial Switchgear has a long standing history as being the toughest, most trusted industrial switchgear on the Asian market.

This legacy has been carried on with new range of industrial plugs and socket connectors.

## Snap Shut Bodies

Screw-less assembly using a 'latching' spring allows for speed, simplicity, product strength and improved reliability. The 'latching' spring clip stays down once it is pressed, so it is just a simple 'press and switch'. The spring clip, when shut, does not exert any stress on the housings, resulting in a stronger body and sleeve.

To Open

1. Look for padlock and arrow icons
2. Align grey band to locked position
3. Insert driver and push down firmly
4. Align grey band to unlocked position
5. Twist body left only

To Close

1. Look for padlock and arrow icons
2. Align grey band to unlocked position
3. Insert driver and push down firmly
4. Align grey band to locked position
5. Twist body right only

## MITA Facility Systems

For power \& data supply at workstations

In-Desk Units bring flexibility to the desktop, such as conference and training rooms. The range facilitates unrestricted individual access to power, media and data right on the table or desktop. Minimal depth also means no restriction on leg movement under the desk or table, even where the units are fitted near the edge.

## Features and benefits

- Integrated into the top of a desk or table with minimal depth
- Provides access to power, media and data
- Brush inserts to prevent the cables becoming lodged
- Configuration can be freely selected thanks to the modular solution
- Power sockets individually fused at 3.15A in accordance to BS6396
- 0.2 m lead to Wieland GST18i3 plug

## FDU - Flush Desk Units

Flush Desk Units are an easily accessible range for supplying electricity to workstations.
The power strip clicks into the built-in frame and can be interchanged or fitted with custom modules as required.

## Features and benefits

- Compact dimensions and features for a quick installation
- Power and data sockets at the rear of the power strip
- Preferred configuration can be selected using the modular solution
- Power sockets individually fused at 3.15A in accordance to BS6396
- 0.2 m lead to Wieland GST18i3 plug

Pop Up Towers fit perfectly in any working environment. The range is ideal for integrating power and data connections in tiny spaces.
Simply press down with your thumb to raise and lower the Pop Up Tower units.
Installation is incredibly simple. PTU is placed in a cut-out 79 mm in diameter and secured to the desk or table top from below using a lock ring.

Features and benefits

- Press down to raise the pop up tower
- Fast and easy to install
- Suitable for desk or table tops
- Power sockets individually fused at 3.15A in accordance to BS6396
- 0.2m lead to Wieland GST18i3 plug

*2.1A shared across both ports

On-Desk Units are perfect for commercial installations such as meeting rooms, offices or desk sharing environments
The ideal solution where flexibility is needed, these can be fixed with mounting brackets or can be free standing.

Features and benefits

- Can be mounted to a desk or table quickly and easily with the mounting brackets
- Preferred configuration can be selected using the modular solution
- Power sockets individually fused at 3.15A in accordance to BS6396
- 0.2 m lead to Wieland GST18i3 plug

The Under Desk Units are available with a plastic profile. It is possible to connect multiple power strips together to form a modular system.
The range is designed primarily as a simple electricity supply unit for office workstations and permanently installed devices such as PCs, monitors, printers, etc.

## Features and benefits

- Easy installation and can be removed at any time
- Multiple fixing options, can be fitted under tables or desks, in cable ducts or in partitions
- Power sockets individually fused at 3.15A in accordance to BS6396
- 0.2m lead to Wieland GST18i3 plug

## Mita SELECT custom modules are the central components of video, audio and network connections.

Their construction offers you simple and flexible installation in facility systems. The versatility of SELECT custom modules make Mita facility systems even more flexible. With the easy-to-swap modules you can create units to meet the individual data, video and audio connection requirements of your customers quickly and simply.

Simple fitting and removal mean that all installations can be quickly adapted to changed requirements or brought up to the current state of the art.

Features and benefits

- Flexibly interchangeable modules
- For data, video and audio connections
- Ability to upgrade your equipment with the latest custom modules.

## 3 and 4 compartment floor boxes

Supplying power and data via raised floor solution offers many advantages for the modern office. Mita floor boxes give you access to power and data wherever it is required. Both the end-user and the installer can benefit from the accessibility.

Cable outlets and lid
The cable outlets are lined with foamed plastic, preventing dirt from penetrating into the box. The lid can be rotated through 180 degrees to reposition the cable outlet in the opposite direction and can be removed in one simple operation.

Strong cover
Lid reinforced with 3 mm steel insert plate.

Pre-wired boxes available
Reduce on-site installation time and avoid wiring errors. Fully assembled and factory tested.

Lockable lid On request.

Metal base box Base box in three different heights, 70 100 and 130 mm .

Flush lid infill
Flush lid infills of linoleum or brushed stainless steel are available as optional accessories.

Snap locks
Snap-locks (plastic lid only) reduce the risk of cables pushing the lid open.

## Hinge

Lid will release when opened in excess of 90 degree angle to prevent damage to box.

## RCD/MCB/RCBO

Protection
The 3-compartment 100 and 130 mm box comes complete with a plastic cover to house a RCD/MCB/ RCBO unit, if required.

DIN rail kit and RCD/ MCB/RCBOs may be purchased separately.
(3 compartment 70 mm box comes complete with a metal blanking plate.)

Quick fix function
For quick and easy installation, self locking tabs push fit into place to secure the box.

## Various knockouts

Various knockouts per compartment for flexible conduits.
70 mm box - $\varnothing 20$ mm 100 mm box - $\varnothing$ 20/25 mm 130 mm box - $\varnothing$ 20/25 mm incl. one Ø 32 mm .

## Easy to install and use

Flexible solution
Use underfloor powertrack and tap-off units from Schneider Electric.

Installations of raised access floor box with underfloor powertrack and tap-off units
A convenient and flexible solution for power distribution in premises where raised access floors have been installed.

Quick-fix function
For quick and easy installation, self-locking tabs push-fit into place to secure the box, effective in all floor types. No tools are required.

Self-closing
The lid is self-closing to minimize the risk of accidents. When opened in excess of 90 degrees, the lid will release.

High capacity
Three or four plates, with metal compartment dividers for good separation of power and data.

Cable outlets
The lid has double cable outlets and can be turned through 180 degrees.

RCD/MCB/RCBO
3-compartment 100 and 130 mm box comes complete with cover to house a RCD/ MCB/ RCBO unit, if required. DIN rail kit and RCD/MCB/ RCBOs may be purchased separately.

Carpet/infill recess
In the plastic trim box the maximum thickness of the insert material is 6 mm and in the stainless steel trim box it is 15 mm .

Cable retainers (optional) To hold cables in place and prevent them being pulled out or damaged between the lid and trim.

Lockable lid (optional)
Available pre-fit, on request.

## MITA

## Floor Boxes

## Empty floor outlet boxes

| Type | Colour | Dimensions <br> AB/C $(\mathrm{mm})$ | Qty per package | Ref. No. |
| :--- | :---: | :---: | :---: | :---: |

Complete, rectangular, three or four compartment floor outlet box for use with British Standard outlets. A wide range of mounting plates in both 75 and 87 mm width are available. The floor box is provided with a quickfix, metal base box. The lid, with integrated cable outlets, can be installed in two positions and can easily be removed during installation and use. The lid can be fitted with a floor material insert; the plastic floor box has a ready-to-use infill available as an accessory.

## Three-compartment floor outlet boxes for 87 mm mounting plates

The three-compartment plastic trimmed floor box has a maximum outlet capacity of $3 \times 2$ gang accessories. The 70 mm deep box comes with a steel cover over the empty space next to the $3^{\text {rd }}$ compartment, whereas the 100 and 130 mm deep versions have a plastic cover. The space underneath the cover gives extra cable space / enhanced bending radius, to the 3rd compartment.
Alternatively, for 100 and 130 mm deep versions, modular DIN-rail equipment, such as an RCD earth leakage breaker, can be used by fixing the optional DIN-rail kit in the bottom of the base box and removing the knockouts in the plastic cover.
Material: PA/ABS, sheet steel.

## Description

The Mita floor box range contains a complete portfolio of products for installation of British Standard outlets for power and data in raised floor applications.
Plastic and stainless steel trimmed floor boxes are available, each including lid, carpet trims and a metal base box, ready for mounting either three or four outlets.
The lid can be infilled with various floor materials. The plastic trim can accommodate an insert of up to 6 mm thickness, and ready-to-use lid infills of grey linoleum or stainless steel are available. The stainless steel trim can accommodate up to 15 mm thick insert materials, such as carpet, wood
or stone tiles.
All floor boxes feature a convenient quick-fix fixing system, enabling a tool-free and secure fit into the floor. The plastic floor boxes are also available in pre-wired versions.

## Benefits

- Quick and easy installation, without tools
- Large outlet capacity
- Wide range of plates and accessories to satisfy end-user requirements
- Three depths: 70, 100 and 130 mm
- The 100 and 130 mm 3 -compartment versions are prepared for integration of a circuit breaker
- Lid recesses can be infilled with most common floor finishes
- Reversible, self closing lid
- Durable and scratch-resistant material
- Pre-wired versions: fully assembled and factory tested to eliminate wiring errors and loss of components and reduced installation times
- According to BS EN 60670-23:2008 standard

| Temperature range | Operating temperature from $-25^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ |  |
| Degree of protection | IP20 |  |
| Standards | The products comply with BS EN 60670-23:2008 |  |
|  | The products satisfy the provisions for CE marking according to the Low Voltage Directive 73/23/EEC and 93/68/EEC |  |

## Metalclad

Accessories

## Metalclad Accessories ESM Range Surface Mount

Made tough in Galvabond with an attractive grey epoxy powder coated finish, easily surface mounted with only two screws, the range is supplied complete with mounting box and integral earthing terminal with all exposed metal parts bonded to earth for safety and protection

Ample conduit entry knockouts allow for ease of installation and with a wide selection of Switches, Sockets, Grids and Fuse Connectors to choose from, the ESM Range is sure to satisfy just about any demanding installation.

ESM Range accessories are built to take hard knocks and look great while doing it.

## Wiring Diagram

## Mechanism - Surge Filter

The surge filter is the protection device which protect electronic equipment from instantaneous over-voltage surges. The filter has a built-in neon lamp to indicate that the module is operating correctly. After repeated clamping of minor spikes, or following a voltage surge that exceeds the capacity of the unit, the Metal Oxide Varsitors may become over stressed and fail, causing the neon lamp to extinguish.

Although the module will no longer offer voltage surge, the power outlet will continue to operate normally and the module should be replaced as soon as possible.

| Specifications |  |
| :--- | :--- |
| Normal Operating Voltage | $265 \mathrm{~V} \mathrm{A.C}$. |
| Normal Operating Current | 10 A |
| Maximum Operating Voltage | $275-369 \mathrm{~V}$ A.C. |
| Typical Capacitance | 900 pF |
| Max. Withstand Current $(8 / 20 \mu \mathrm{~s})$ | 6.5 kA |
| Max. Clamping Voltage $(8 / 20 \mu \mathrm{~s}, 100 \mathrm{~A})$ | 710 V |
| Energy Absorption | $3 \times 140 \mathrm{~J}$ |

Intermediate Switch
Wiring Diagram

Use this intermediate switch for a 3-way switching design only and in accordance with the schematic wiring on the left. We do not recommend using it in any other applications, as it changes the polarity of a circuit that may cause danger to life and/or damage to appliances.

Pneumatic Time Delay Switch
Wiring Diagram

Turn on the timer by pressing the button in. The switch will stay on until the button returns out and the time delay Can be adjusted from 2 to 10 minutes. For adjustment, carefully rotate arm at rear of switch by Small increments.

## outlet - FCC standard

Wiring Diagram

The Schneider Electric fan controller is a solid state unit, designed to provide smooth speed variations from full to slow on Most fans. Fan speed Can set to suit any conditions. Full speed for efficient exhaust of stale air or steam in kitchens and bathrooms. Otherwise, the controller should be adjusted to the low setting for constant, quiet circulation and change of fresh air.
Any number of fans May connect in parallel up to a total loading of 400VA. Only similar types of fans should be connected in parallel to minimize the possibility of resultant variable speeds.

## Telecommunication Accessories TV-FM Socket Outlets <br> Wiring Diagram

Schneider Electric TV-FM provides safety isolation rated at 2 kV a.c. between aerial lead and socket. Twin outlet with TV/FM diplexer for connection to single coaxial cable with combined TV and FM signals.

| Specifications |  |  |

## Telephone outlet - BS standard

Wiring Diagram
Example of typical connection:

1. Connection to 2 and 5
2. Earth recall (when used) Connect to terminal 4
3. Connection to terminal 3 is not usually required.

All socket outlet connections are in parallel - any number of socket outlets can be connected, but it is recommended that only a maximum of 5 telephones can be used at any one time on one line.

## 56 International Protection Ratings

IP Ratings or International Protection Code is a standard rating system that indicates the type of environments in which a particular instrument is capable of operating.
The IP Rating takes the form of IPXX where XX are numbers corresponding to a particular rating. The first digit is for solid particle ingress, and the second is for liquids ingress,

No. | Protected against solid objects larger than 50 mm |
| :--- |
| (e.g. Accidental contact with hand) |

## Dimmer switches <br> Circuit, Iamp and other equipment compatibility

To ensure optimum performance and reliability is obtained from dimmer switches the following recommendations and precautions should be followed as appropriate to the type of dimmer:

## General recommendations

Circuits
It is recommended that all lighting circuits incorporating dimmers be protected by a 6 A or up to a 10 A maximum Type B miniature circuit breaker.

## Dimmable low voltage transformers

- Always check transformer compatibility BEFORE installation and if in doubt always check with the dimmer Helpline or the transformer manufacturer. It is recommended that electronic dimmable transformers be loaded to at least $70 \%$ of their rated maximum wattage.
- When running multiple lamps on dimmable electronic transformers ensure that all lamps are working correctly. Replace failed lamps as soon as possible as a single failed lamp may cause flickering of all other lamps connected to the same dimmer.
- Do NOT mix electronic and magnetic transformers on the same dimmer switch.
- It is recommended that a maximum number of 5 low voltage transformers only should be connected to an individual dimmer switch
- These electronic dimmer switches, except 1 kW , use leading edge (phase delay) dimming technology and must therefore be used with compatible good quality dimmable electronic or wire-wound (magnetic) transformers. Trailing edge (phase cut) dimmable transformers must not be used.
- The 1 kW dimmer switch uses trailing edge (phase cut) dimming technology and must therefore be used with compatible good quality dimmable electronic transformers. Do not use the 1 kW dimmer with magnetic transformers.

## Circuits

- For two-way or more switching ONLY use retractive switches. Do NOT use two-way switches
- The live supply for retractive switches must come from the live (L) connection of the dimmer.
- Do NOT use with Compact Fluorescent Lamps (CFL) even if marked "dimmable", fluorescent lamps and Light Emitting Diode (LED) lamps of any description or motor loads.

## Tungsten/Mains Voltage Tungsten halogen Lighting

Most Tungsten lamps can be dimmed; these include standard GLS lamps, candle lamps, reflector and mains voltage Tungsten halogen lamps etc. Tungsten lamps of mains voltage halogen type (GZ10, GU10 or G9) can be dimmed using standard Tungsten dimmers. However, to protect the dimmer, it is important to de-rate the dimmers maximum rating by $50 \%$, (e.g. for dimmer rated as 50W-400W, it's Tungsten halogen
lamp rating becomes 50W-200W). This de-rating requirement only applies to plate and grid dimmers rated up to 1500 W , for other dimmers, observe individual product guidelines. While observing maximum dimmer ratings, also ensure that the connected load is not less than the minimum rating of each dimmer, otherwise the lamps may flicker and the dimmer may fail.

## Tungsten halogen lamps

When using mains voltage Tungsten halogen lamps, it is essential that these types of lamp incorporate internal fuses or are constructed such that arcing at the end of life cannot occur and are from quality lamp manufacturers. The use of inferior low quality lamps is not recommended and will invalidate any guarantee or warranty supplied with the dimmer switch.

## LED Lamps - Important information

Schneider Electric LED dimmers have been tested to operate with a wide range of quality dimmable LED lamps. In every instance ensure a quality branded dimmable lamp is used to provide suitable compatibility. However whilst every attempt is made to ensure compatiility with the majority of manufacturer lamps due to onoing developments of both dimmers and lamps, Schneider cannot guarantee operation in every instance. Schnieder Electric always recommend that the lamp is tested for operation before it is used throughout the installation.

If the LED lamp flickers at minimum dim Level, use the below procedure to set the LED lamp to adjust and set a higher minimum dimmer position. Please note by using this procedure the minimum dim level of the LED lamp would be increased.

Attention:

* Only to be used if the lamp flickers at the minimum brightness:

Technical specification
Rated Voltage: 220 V-230 Vac 50 Hz
(not compatible with $100-125 \mathrm{Vac}$ or 60 Hz supplies)
Product standards: EN 60669-2-1

| Type of ballast | Minimum <br> Load | Maximum <br> load |
| :--- | :--- | :--- |
| Mains voltage tungsten <br> halogen lamp | 25 W | 100 W |
| Low voltage halogen <br> lamp | 25 W | 100 W |
| LED lamp* | 5 W | 100 W |

## Dimmer switches

## Dimmer installation

Moulded plate mounted dimmers can generally be used with the supplied pattress to replace standard wall switches (where a 16 mm box depth is typically used). For flat plate mounted dimmers, 25 mm boxes are required. All rotary dimmer terminations and wiring are the same as for standard switches, i.e. COM, L2 (and also L1 for two-way dimmers). Rotary one-way dimmers can only be used for switching and dimming from one position. Rotary two-way (push) dimmers can be used to replace any one, (but not both), of the two-way switch circuit, (note that only one dimmer can be used per switch circuit or lamp(s); thus the lights can be switched from more than one position but can only be dimmed from one. With any rotary dimmer, if replacing an existing switch or dimmer, make a careful note of which wires are installed in which terminals on the old unit, and then connect them into the terminals with corresponding markings on the new dimmer. To ensure that plate temperatures are within maximum limits, maximum total connected load for a single size plate is 630 W , and for a double size plate, 1000 W . For low voltage lighting, remember to allow for transformer losses when calculating the total circuit load, typically $15 \%-20 \%$. To use electronic dimmers in 1,2 or more way circuits the specific circuit diagrams detailed and the Important Notes MUST be followed exactly.

| Maximum permitted loads in Watts for multiple dimmers in a single enclosure |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Front plate gang size | 2 | 3 | 4 | 6 | 8 | 9 | 12 | 18 | 24 |
| Per row (max rating W) | 400 | 480 | 480 | 480 | 480 | 480 | 480 | 480 | 480 |
| Total plate (max rating W) | 400 | 480 | 480 | 740 | 740 | 940 | 940 | 1440 | 1800 |

## Simulated 'Off - Click'

Recent developments within the industry have resulted in rotary dimmer modules not having the positive 'Off Click' as the dimmer is switched off. This has led to consumers returning products identifying they are not functioning. To counter this, Schneider Electric have a 'simulated Off'. The range has been designed to withstand a higher inrush current than others in the market. This inrush is typical when lamps turn on for the lamps 'blow'. Typically this inrush or energy surge can be up to 100 times the normal current being supplied to a lamp. For example the inrush for a 150 W lamp could be up to 40 NS over 10 milliseconds. A number of dimmer products in the market when tested have a maximum capacity of approximately 20NS. The Schneider Electric product has an equivalent capacity of 50NS. This, therefore means that the Schneider Electric product will last longer within installations, depending on the switching duty. A thermal fuse protects the Schneider Electric module. This will not protect the unit against an inrush but against overloads and shortcircuits etc. This fuse is not self restoring or replaceable. It's function is to protect against electrical and fire damage. This requirement was not mandatory in the previous standard and therefore some modules in circulation potentially do not have the safety feature, unlike ours.

## Rotary and 2 way (push) dimmers

## Circuits

- Only use two-way (push) dimmers in two-way switching circuits. Only use one two-way dimmer in a two-way switching circuit.

## Lamps

- These dimmer switches are suitable for dimming incandescent lamps and dimmable CFL lamps only and are NOT to be used with fluorescent lamps, Light Emitting Diode (LED) lamps of any description or motor loads. Use of non-dimmable CFL lamps may permanently damage the dimmer or the lamp and will invalidate any guarantee or warranty supplied with the dimmer switch.
- It is recommended that a maximum number of 5 dimming CFL lamps only should be connected to an individual dimmer switch.

## Dimmable low voltage transformers

- Only use low voltage dimmers with transformers. Do not use mains voltage dimmers.
- The low voltage dimmer switches use leading edge (phase delay) dimming technology and must therefore be used with compatible good quality dimmable electronic or wire-wound transformers. Trailing edge (phase cut) dimmable transformers must not be used.

## 1 way installation wiring diagram electronic dimmers

## IMPORTANT NOTES - for 1 way Installation

1. Read General Installation Safety Instructions before starting work
2. Do not connect any conductor to dimmer terminal marked RS. This is for use with 2 way switching

## Dimmer switches

2 way and multi-way installation wiring diagram where retractive switches are required

Important notes - for two way and multi - way installation

1. Read General Installation Safety Instructions before starting work
2. Any existing 2 way or intermediate switches MUST be replaced with retractive press switches.
3. Any number of retractive press switches may be installed provided total cable length does not exceed 50m.
4. Either 1 way normally open or 2 way retractive push switches may be used.
5. If 2 way retractive switches are used, connect to Common (COM) and normally open L1 (1 way) terminals as shown. Do NOT use the L2 (2 way) terminal.
6. If replacing an existing 2 way switch, cut back and insulate the unused 2 way wire previously connected to the $L 2$ (2 way) terminal.
7. All metal wall boxes and metal plate switches must be earthed.
8. Do NOT connect more than 1 dimmer in the same circuit.
9. Remove label covering centre terminal on rear of dimmer. This terminal is to be connected to retractive switch as shown in wiring diagram. Do NOT connect any other conductor to this terminal.

## Wiring accessories

## Co-Axial and Satellite sockets

Non isolated
Non-isolated products are intended for direct connection to a single or two separate TV/FM aerial downleads. These units are not designed for use in multi outlet systems.
Single TV/FM outlet for connection to a single TV or FM coaxial aerial lead.
Twin outlet for connection to each of two separate TV/FM, coaxial aerial leads.

## Diplex and Triplex

## Performance

Diplex
TV/FM diplex units for connection to a single coaxial aerial lead with combined TV and FM signals. The connector standard IEC 169-2 plug for TV and IEC 169-2 socket for radio.

Triplex
TV/FM/SAT triplex unit for connection to a single coaxial aerial lead with combined TV, FM and satellite signals.
TV: 470-860MHZ
Radio: (FM) $87.5-108 \mathrm{MHz}$ and (DAB) $217.5-230 \mathrm{MHz}$.
Satellite: DC -200 kHz and $950-2300 \mathrm{MHz}$.
The connector standard is ' $f$ ' for satellite, IEC 169-2 plug for TV and IEC 169-2 socket for radio.

## Telephone socket outlets

It is legal for a contractor to install a secondary telephone socket with associated wiring into house-holds with single exchange lines. The contractor may install a secondary socket and wire up to the master socket and wiring to the exchange. This does not include wiring the actual master socket or to the exchange itself. This final connection must be made by an approved installer.

For commercial and industrial installations a PBX (or PABX) internal exchange or 'intelligent' telephones are often fitted. In this case, the contractor may install all of the equipment except for the PBX unit installation. Again this must be carried out by a BSI approved installer and the interface between the PBX/PABX internal system and the incoming external lines must be connected by British Telecom.

Schneider Electric telephone sockets are suitable for use in accordance with BS 7671, formerly the 18th Edition of the IEE Wiring regulations and should be wired in accordance with the diagrams shown.

Example of typical connection
1 Connection to 2 \& 5
2 Earth recall (when used) connect to terminal 4
3 Connection to terminal 3 is not usually required
NB (a) Standard 4 wire cable is shown below as incoming cable. If terminals 1 and 6 (normally unused) are required, 6 wire cable may be used.
(b) All socket outlet connections are parallel - any number of socket outlets can be connected, but it is recommended that only a maximum of 5 telephones be used at any one time on one line.

## 56 Series
